Executive Director & Civil Registrar-General

MARCELO M. ORENSE Assistant Executive Director

# **FOREWORD**

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

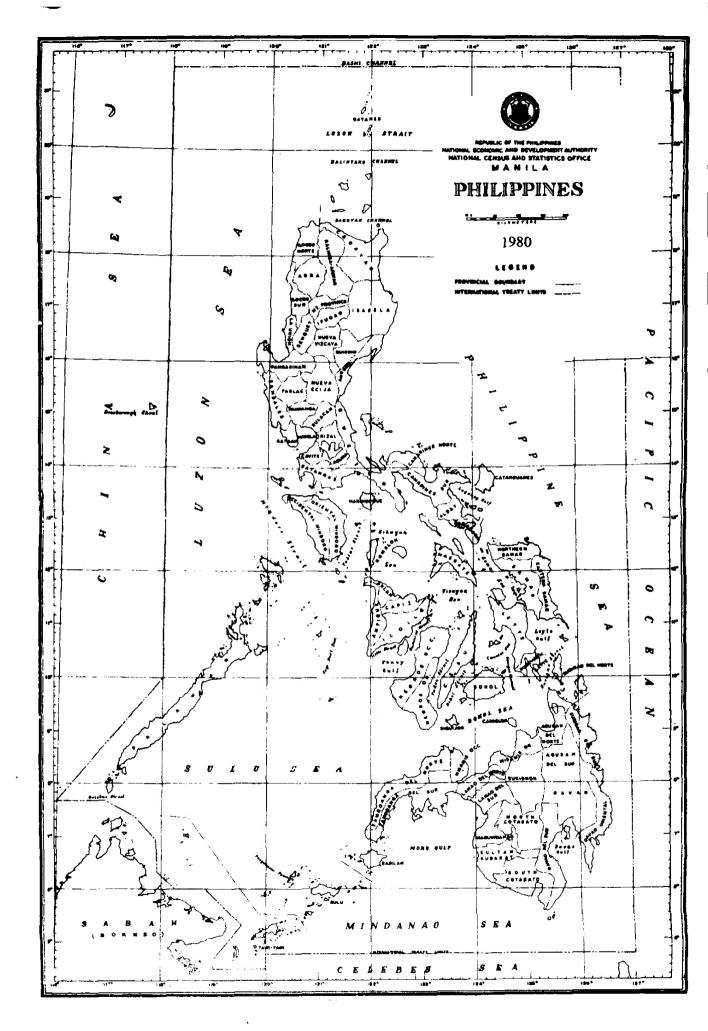

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

- Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

# **Explanatory Text**

#### **GENERAL**

# INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

# **AUTHORITY FOR THE 1980 CENSUS**

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every oensal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

# INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

### CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

## CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

# METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

### PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

# POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

# CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

# **DEFINITION OF TERMS AND CONCEPTS**

### I - POPULATION

# **BARANGAY**

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

# **ENUMERATION AREA**

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

### URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
  - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation:
  - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
  - c. At least three of the following:
    - A town hall, church or chapel with religious services at least once a month;
    - 2) A public plaza, park or cemetery;
    - 3) A market place or building where trading activities are carried on at "least once a week;
    - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

# PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- 1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
  - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions;
  (2) in mental hospitals;
  (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

### PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- 1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival:
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

# USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

# **HOUSEHOLD**

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

# PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

### RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

# LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

# **HEAD OF HOUSEHOLD**

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

# RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- 1. Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

### AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

### **MARITAL STATUS**

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

# CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

# LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

# HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

### USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

# **INDUSTRY**

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

# **EVER-MARRIED WOMAN**

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

## II – HOUSING

# BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

# The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.
  - Commercial a building used for transacting business or rendering professional services, such as a storage or an office building.
  - Industrial a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.
  - Agricultural any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.
- 6. Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

# **DWELLING UNIT**

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

### CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- 4. Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

# CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

# YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

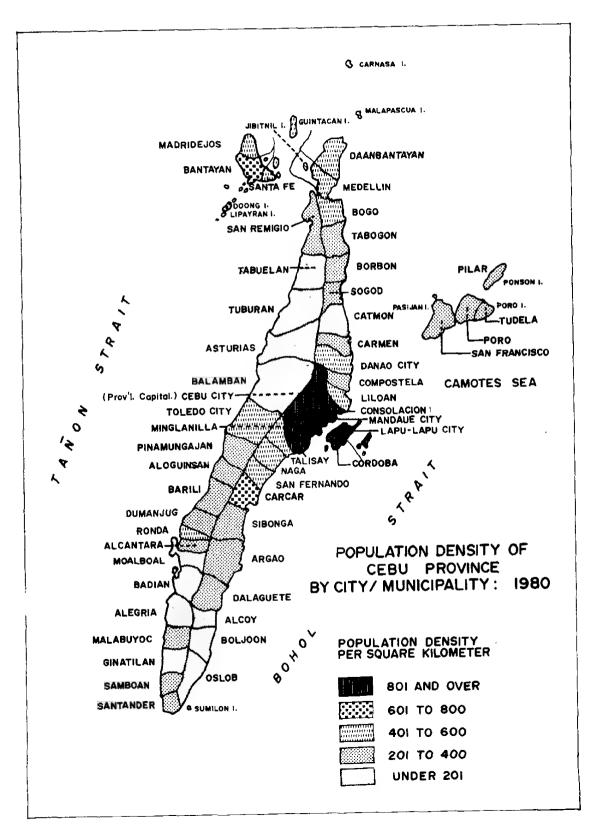

## NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

# FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

# Cebu: A Brief Analysis

Cebu is an island province located almost at the center of the Visayas. The province is separated from Bohol in the southeast by the Bohol Strait, from Negros Oriental in the west by the Tañon Strait, and from Leyte in the east by the Camotes Sea. Included in the province are the islands of Mactan and Camotes in the east and Daanbantayan situated northwest and separated from the mainland by the narrow Daijagoan Canal. Its strategic position in the heart of the Visayas and Mindanao has been a dominant factor in its commercial, industrial, educational and political development.

Cebu stretches some 200 kilometers from north to south. Its widest point, located near Cebu City, is approximately 41 kilometers. The terrain is rugged and mountainous with low peaks at the center of the island gradually leveling at the northern and southern ends. Along the coastline are narrow plains, except for a wider expanse of flat lands at the southern portion.

Cebu's coastline provides the finest and safest natural harbor in the country, thus numerous ports are found around the coast. Before the discovery of the Philippines, ships from the East Indies, China and Thailand had traded at these ports. There are 7 national and 30 municipal ports where inter-island vessels from Manila and Mindanao load and unload products. The airport at Mactan serves as an alternate international airport for the country.

The large wooden cross left by Magellan in 1521 and the Basilica of the Santo Niño which houses the image given by Magellan to Queen Juana on her conversion to Christianity are among Cebu's landmarks. The province is also noted as a leading producer of copper. Large deposits of copper are mined by the Atlas Consolidated in Toledo City.

The province has 48 municipalities and five cities. Cebu City, one of the oldest cities of the Philippines, is the provincial capital. It is also the commercial center of the southern half of the Philippines, serving as the principal distribution point for Central Visayas and for Northern Mindanao.

# **POPULATION**

The province had a population of 2,091,602 as of May 1, 1980, equivalent to 4.35 percent of the country's total population. Its population ranked first among the country's 73 provinces and is also the highest in Region VII. The annual growth rate of the province (2.84%) was slightly higher than the 1970-1975 rate of 2.16 percent. Likewise, population density increased from 357.4 persons per square kilometer in 1975 to 411.1 in 1980.

The province remained predominantly rural despite an increase of 3.19 percentage points in urban population (41.06% in 1975 to 44.25%) and a decrease of rural pupulation from 58.94 percent in 1975 to 55.75 percent. Compared to the 1975 census, the proportion of male urban residents increased from 20.21 percent to 21.62 percent while that of female urban residents likewise increased from 20.85 percent to 22.63 percent. Correspondingly, a decrease in the proportion of male rural residents was observed from 29.57 percent to 27.84 percent and female rural residents from 29.37 percent to 27.91 percent.

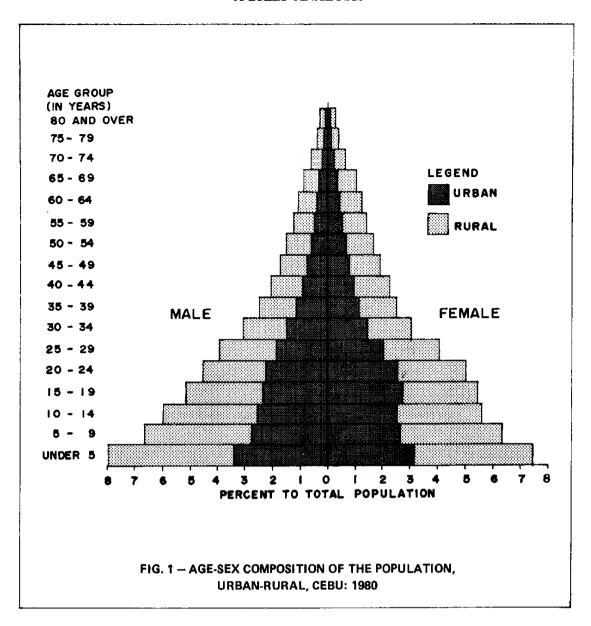

The following table shows the urban-rural distribution of the population by sex for three censal years:

TABLE A — URBAN-RURAL POPULATION BY SEX, CEBU: 1970, 1975 AND 1980

Area Classification	1980		19	1975		1970	
and Sex	Number	Percent	Number	Percent	Number	Percent	
Total	2,091,602	100.00	1,818,410	100.00	1,634,182	100.00	
Male Female	1,034,497 1,057,105	49.46 50.54	905,246 913,164	49.78 50.22	796,924 837,258	48.76 51.24	
Urban	925,554	44.25	746,642	41.06	<u>652,200</u>	<u>39.91</u>	
Male Female	452,233 473,321	21.62 22.63	367,611 379,031	20.21 20.85	314,151 338,049	19.22 20.69	
Rural	1,166,048	<u>55.75</u>	1,071,768	58.94	981,982	60.09	
Male Female	582,264 583,784	27.84 27.91	537,635 534,133	29.57 29.37	482,773 499,209	29.54 30.55	

The sex ratio (number of males per 100 females) of the population decelerated from 99.13 in 1975 to 97.86, the females still outnumbering the males. A similar pattern prevailed in urban areas with a sex ratio of 95.54. The number of males and females in rural areas was almost balanced having a sex ratio of 99.74.

From persons under 5 years of age to the 80 years old and above, the rural male and female population lessen as each age group becomes older. A graph of the relationship results in a pyramid-like structure with children below 5 years of age forming the broad base and the adults 80 years and above forming the apex. Urban male population follows the same pattern while urban female population shows disagreements to the pyramid configuration. Urban females aged 5-9 are outnumbered by the 15-19 years old while the 10-14 age group is exceeded by the 15-19 and 20-24 age groups (Figure 1).

# AGE COMPOSITION

The proportion of persons belonging to the younger age group (0-14 years) is continually experiencing a downward trend. After a decrease of 1.46 percentage points between 1970 and 1975, it again decreased from 42.62 percent in 1975 to 40.11 percent. However, the proportion of persons in the productive ages (15-64 years) increased from 53.72 percent in 1975 to 55.37 percent, following its 1970-1975 increase of 1.43 percentage points. A similar pattern is noted in the proportion of persons 65 years and over. From 3.66 percent in 1975, it increased to 4.52 percent while an almost constant population is observed in the preceding censuses (3.66% - 1975; 3.63% - 1970). Consequently, the population is growing older by 1 year, registering a median age of 18 years in 1975 and 19 years in 1980.

Rural areas have a higher proportion of the youth population than urban areas (41.24% against 38.69%), while the proportion of persons in the productive or working age group is higher in the urban (57.69%) than in the rural areas (53.53%). The proportion of older persons is consequently higher in rural (5.23%) than in urban (3.62%) areas.

Comparative figures on the age composition of the population are shown in the accompanying table:

TABLE B – AGE COMPOSITION OF THE POPULATION, CEBU: 1970, 1975 AND 1980

Age Composition	19	80	19'	75	197	0
	Number	Percent	Number	Percent	Number	Percent
Total	2,091,602	100.00	1,818,410	100.00	1,634,182	100.00
0-14 years	838,896	40.11	775,095	42.62	720,307	44.08
15-64 years	1,158,197	55.37	976,824	53.72	854,509	52.29
65 years and over	94,509	4.52	66,491	3.66	59,366	3.63

The dependency ratio for the province decelerated from 86.16 in 1975 to 80.59 due to the increased percentage of persons in the productive or working age group. The rural dependency ratio differed by as many as 13.47 dependents to the urban ratio, 86.80 for rural and 73.33 for urban. Comparatively, the dependency ratio was higher among the males at 84.84 than among females at 76.62 (Table 3).

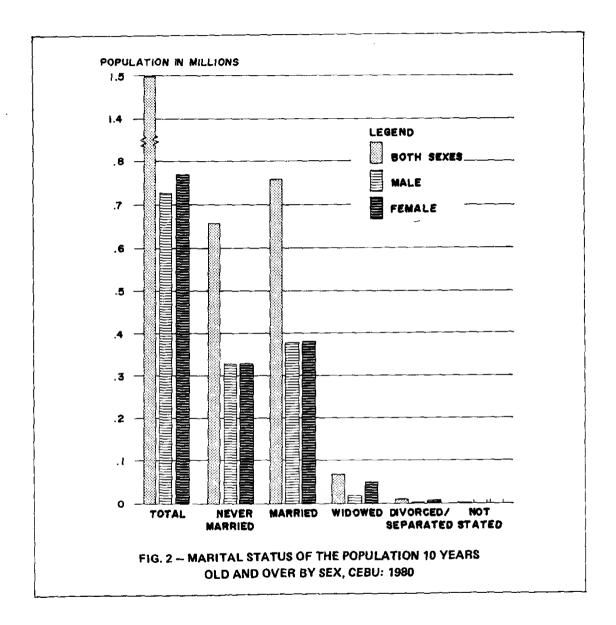

### MARITAL STATUS

After being ahead in number in two censal periods (48.39% - 1970; 48.79% - 1975), never married persons declined to 43.92 percent. On the other hand, married persons steadily increased from 46.71 percent in 1970 to 47.34 percent in 1975 and comprised the biggest proportion of the population 10 years old and over (50.66%) in 1980. The widowed and divorced or separated constituted 4.63 percent and 0.68 percent, respectively, while those with unknown status made up 0.11 percent.

A larger percentage of the never married group was observed in the urban (46.59%) than in the rural (41.73%) areas. Correspondingly, rural areas had higher proportions of married (52.35%) and widowed (5.17%) persons than the urban areas (48.60% and 3.97%, respectively). The proportion of divorced or separated persons slightly differed between the urban (0.74%) and rural (0.63%) areas while persons whose marital status was unknown had nearly the same proportion for urban (0.10%) and rural (0.12%) population.

Nearly one-half (45.13%) of the males were single as compared to 42.77 percent single females. The proportion of married females increased by 2.24 percentage points over the 1975 figure (47.34% to 49.58%) which was also lower than their male counterparts by 2.23

percentage points. Females were more likely to lose their mates either by death (6.58%) or by divorce or separation (0.92%) than males (2.57% widowed and 0.42% divorced or separated). The proportion of males and females with unknown marital status was only 0.07 percent and 0.15 percent, respectively.

Shown in Table C is the classification of the population 10 years old and over by sex and marital status.

A BRIEF ANALYSIS

TABLE C — POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, CEBU: 1970, 1975 AND 1980

Sex and	19	80	1975		1970	
Marital Status	Number	Percent	Number	Percent	Number	Percent
Both Sexes	1,498,432	100.00	1,284,824	100.00	1,131,243	100.00
Never married	658,095	43.92	626,835	48.79	547,398	48.39
Married	759,164	50.66	608,277	47.34	528,386	46.71
Widowed	69,365	4.63	44,479	3.46	46,749	4.13

Not stated	1,132	0.15	576	0.09	1,360	0.23

# HIGHEST GRADE COMPLETED

The proportion of persons with elementary education still remained at a high level, despite its decline from 61.51 percent in 1975 to 58.29 percent of the private household population 7 years old and over. However, an increased proportion of persons schooled in the secondary (14.80% to 17.52%) and college levels (5.09% to 6.92%) is noted. Academic degree holders likewise increased from 3.95 percent to 5.07 percent. The proportion of those who had no formal education as well as those who did not reveal their educational attainment decreased from 12.37 percent to 12.02 percent and from 2.28 percent to 0.18 percent, respectively.

Of those who had training in the elementary level, 36.96 percent finished at most the third grade; 21.50 percent, the fourth grade; 13.64 percent, the fifth grade and 27.90 percent, the sixth or seventh grade. Among those with high school education, 69.13 percent completed at least the first year, but not higher than the third year, while 30.87 percent graduated from fourth year. A little less than four-fifths (79.84%) of those who attended college completed at most the third year while more than one-fifth (20.16%) finished fourth year or higher (Table 5).

Males outnumbered the females in three levels of education. For the elementary level males comprised 58.34 percent of the male population 7 years old and over compared to 58.26 percent of the female population in the same age bracket while for the secondary level, males totalled 18.46 percent and females, 16.61 percent. On the college level males constituted 7.28 percent and females, 6.57 percent. Among academic degree holders, however, females predominated with 5.38 percent compared to males with 4.75 percent. Females also registered a higher proportion of those who had no formal education (females – 13.01%; males – 10.98%).

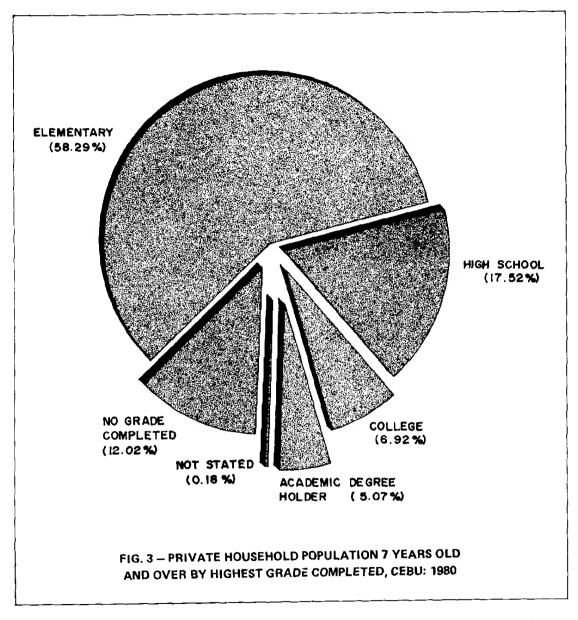

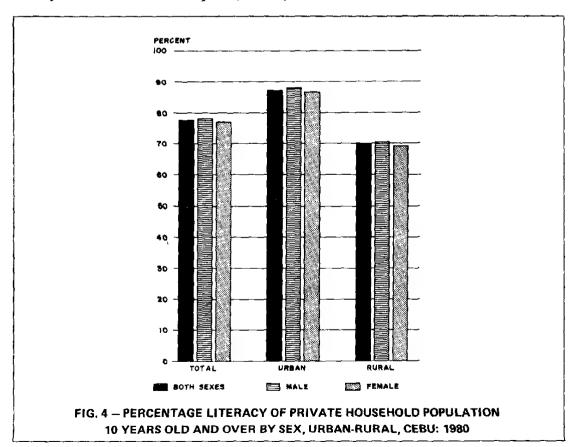

Table D shows the distribution of the private household population 7 years old and over by highest grade completed in the last two censal years.

TABLE D -- PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, CEBU: 1975 AND 1980

Highest Grade	19	980	19	1975		
Completed	Number	Percent	Number	Percent		
Total	1,653,783	100.00	1,437,634	100.00		
No grade completed	198,757	12,02	177,793	12.37		
Elementary	964,079	58.29	884,330	61.51		
High school	289,667	17.52	212,769	14.80		
College	114,401	6.92	73,208	5.09		
Academic degree holder	83,894	5.07	56,746	3.95		
Not stated	2,985	0.18	32,788	2.28		

# LITERACY

Of the total private household population 10 years old and over, more than three-fourths (77.68%) were literate. Urban areas with 87.37 percent had a higher rate of literacy than their rural counterparts (69.80%).

Males were more literate than females, the former having a literacy rate of 78.27 percent and the latter, 77.12 percent. In urban areas, male literates comprised 88.17 percent compared to 86.64 percent for females. For the rural males, a total of 70.47 percent were literate, slightly higher than the the 69.16 percent literacy rate of rural females.

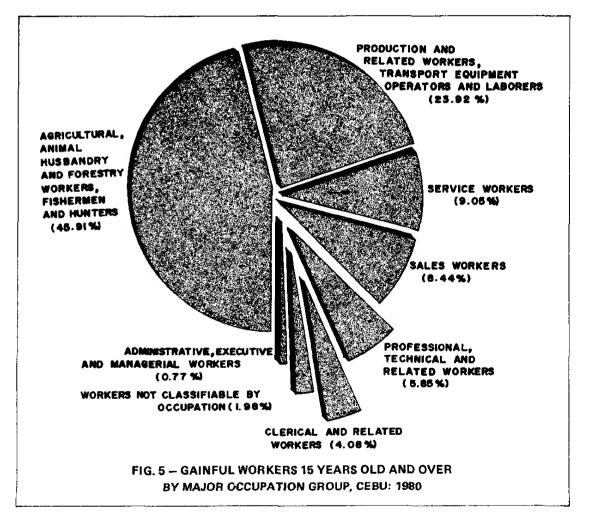

### LANGUAGE OR DIALECT

At least 28 languages and dialects are reported spoken in the 53 municipalities and cities of the province with Cebuano taking the overall lead. This is true in 13 municipalities where Cebuano is spoken exclusively.

Almost all of the 389,656 households (99.30%) in the province speak Cebuano. Tagalog is reported by 0.24 percent; Chinese, 0.11 percent; Hiligaynon (Ilongo), 0.09 percent and Bicol, 0.07 percent.

## GAINFUL OCCUPATION

More than one-half (56.73%) of the private household population 15 years old and over are engaged in gainful occupations (Table 8).

Agricultural, animal husbandry and forestry workers, fishermen and hunters make up the biggest group of gainful workers with 45.91 percent despite its decline by as much as 5.50 percentage points from 1975. Production and related workers, transport equipment operators and laborers remain second with 23.92 percent, an increase of 3.08 percentage points over the 1975 figure. Service workers moved up to third place with a slight increase, from 8.69 percent in 1975 to 9.05 percent. Sales workers follow closely with 8.44 percent, but declined 0.75 percentage point. More gainful workers shifted to professional, technical and related occupations, gaining 1.27 percentage points from 1975 to 5.85 percent. Clerical and related workers likewise increased from 3.04 percent to 4.08 percent. Administrative, executive and managerial workers, on the other hand, showed a downward trend from 1.13 percent to only 0.77 percent in 1980. The proportion of workers not classifiable by occupation slightly increased from 1.12 percent to 1.98 percent.

The following table reflects changes in the proportion of workers engaged in various gainful occupations from 1975 to 1980:

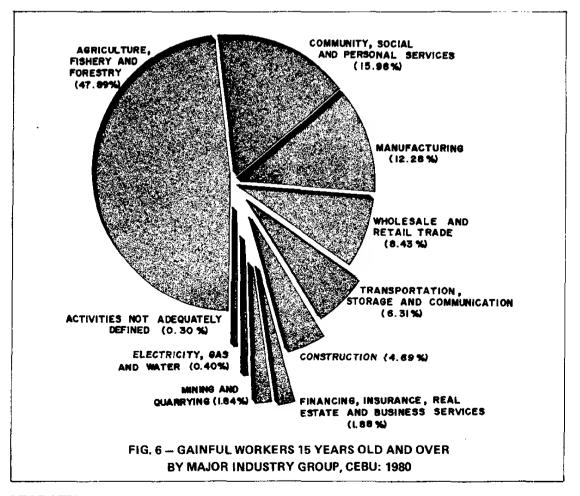

TABLE E — GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, CEBU: 1975 AND 1980

Major Occupation	19	980	19	1975		
Group	Number	Percent	Number	Percent		
Total	707,639	100.00	569,154	100.00		
Professional, technical and related workers	41,373	5.85	26,053	4.58		
Administrative, executive and managerial workers	5,455	0.77	6,452	1.13		
Clerical and related workers	28,849	4.08	17,307	3.04		
Sales workers	59,709	8.44	52,286	9.19		
Service workers	64,039	9.05	49,491	8.69		
Agricultural, animal husband- ry and forestry workers, fishermen and hunters	324,912	45.91	292,604	51.41		
Production and related work- ers, transport equipment operators and laborers	169,254	23.92	118,591	20.84		
Workers not classifiable by occupation	14,048	1.98	6,370	1.12		

### **INDUSTRY**

Agriculture, fishery and forestry predominated over all the other industry groups, employing 47.89 percent of the total gainful workers in the province. More than four-fifths (84.48%) of the agricultural workers derive their income from agricultural crop production;

13.74 percent, from fishery; 0.93 percent, from the production of livestock, poultry and other animals and a small percentage, from agricultural services (0.45%) and forestry (0.39%). Community, social and personal services, the second biggest industry group, employ 15.98 percent, with the workers concentrated in personal and household services (48.15%), education services (19.56%) and public administration and defense (15.55%). Manufacturing ranks third with 12.28 percent. Most of the workers in this industry group are engaged in the manufacture of wood and wood products, including furniture and fixtures (27.33%); textile, wearing apparel and leather (22.98%) and food, beverages and tobacco (15.55%). Wholesale and retail trade has 8.43 percent of the gainful workers; transportation, storage and communication, 6.31 percent; construction, 4.69 percent; financing, insurance, real estate and business services, 1.88 percent; and mining and quarrying, 1.84 percent. Gainful workers engaged in electricity, gas and water (0.40%) and in activities not adequately defined (0.30%) constitute less than one percent (Table 9).

## MIGRATION

Out of 1,763,676 persons 5 years old and over in private households, 94.49 percent were residents of the same city/municipality on May 1, 1975 and on May 1, 1980. Those who changed residence in other municipalities within Cebu (intra-provincial migrants)

constituted 3.22 percent and those who were residents of another province (inter-provincial migrants), 2.17 percent. A negligible percentage (0.12%) were residing in foreign countries.

In two migratory movements the females exceeded the males -1.77 percent females and 1.45 percent males for intra-provincial migration, and 1.16 percent against 1.01 percent, respectively, for inter-provincial migration. Among former residents of foreign lands, however, 0.06 percent were females while 0.06 percent were males (Table 10).

# TYPE OF BUILDING

Almost all or 95.24 percent of the 389,656 households in the province are occupying single houses. A few occupy apartment/accesoria/condominium/row house/etc. (1.42%), duplex (1.44%), improvised houses such as barong-barong (1.42%) and commercial/industrial/agricultural buildings (0.43%). Households occupying other types comprise only 0.05 percent (Table 1).

More households living in single houses are rural residents (59.22%) while 40.78 percent are urban dwellers. As may be expected, the number of households living in duplex is higher in urban (81.67%) than in rural areas (18.34%). The same is true for occupants of apartment/accesoria and similar structures; 96.03 percent are in the urban areas with merely 3.97 percent in rural areas. Likewise, urban areas have bigger shares of households living in improvised structures (54.70%), commercial/industrial/agricultural buildings (88.42%), other housing units (66.67%) and hotel, lodging house, dormitory, etc. (70.00%). Institutional buildings such as hospital, convent and school dormitory are all found in the urban areas. However, other collective living quarters are all found in the rural areas.

TABLE F \_ NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, CEBU: 1970 AND 1980

	1	980	19	1975		
Type of Building	Number	Percent	Number	Percent		
Total	389,656	100.00	290,162	100.00		
Single house	371,095	95.24	275,661	95.00		
Duplex	5,592	1.44	4,208	1.45		
Apartment/accesoria/condo-						
minium/row house/etc.	5,540	1.42	4,091	1.41		
Improvised (barong-barong)	5,539	1.42	3,912	1.35		
Commercial/industrial/agri-				_		
cultural	1,676	0.43	2,236	0.77		
Other housing unit: natural						
shelter, boat, etc.	120	0.03	_			
Hotel, lodging house, dor-						
mitory, etc.	50	0.01	_	_		
Institutional (hospital, con-						
vent, school dormitory, etc.)	40	0.01	54	0.02		
Other collective living quarters (military camp, etc.)	4					

xxxii

Table F shows that the housing condition in Cebu has not been greatly affected by the urbanization growth of the province. The proportion of households occupying single houses increased slightly after 10 years, from 95.00 percent in 1970 to 95.24 percent. Similarly, the proportion of households living in duplex, apartment/accesoria/condominium/row house/etc. and improvised structures are almost constant compared with the preceding housing census.

# TYPE OF OCCUPANCY

Of the total number of households, 84.89 percent are owners of their dwelling units. The rest are either tenants/lessees (9.44%), subtenants/sublessees (0.30%) or rent-free occupants (5.37%). Majority of the rural (93.38%) as well as the urban households (73.42%) occupy dwelling units in the owner-occupied category (Table 1).

## CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Majority (59.10%) of the households live in dwelling units with roof of cogon or nipa while 35.44 percent live in units with roof of galvanized iron or aluminum. Households occupying units with roof of other materials such as anahaw constitute 3.92 percent; with makeshift or salvaged materials, 0.97 percent and with tile/concrete/brick/stone and asbestos, 0.57 percent. Of the urban households, 50.19 percent occupy dwelling units with roof of galvanized iron or aluminum and 47.35 percent, of cogon or nipa. A higher proportion of the rural households, on the other hand, live in units constructed with roof of cogon or nipa (67.81%) than of galvanized iron or aluminum (24.51%). Households occupying units with roof of other materials comprise only 0.59 percent in urban areas and 6.40 percent in rural areas while those in units with roof of makeshift or salvaged materials make up 1.15 percent and 0.83 percent, respectively.

Over two-fifths (42.95%) of the households dwell in units with outer walls of wood or plywood; 31.02 percent, of bamboo or sawali; 10.42 percent, of mixed tile, concrete, brick, stone and wood or plywood; 8.53 percent, of cogon or nipa; 3.04 percent, of other materials; 2.00 percent, of tile, concrete, brick or stone and 1.73 percent, of makeshift or salvaged materials. A negligible number dwell in units with outer walls of galvanized iron or aluminum (0.27%) and of asbestos (0.04%). In urban areas a higher proportion of the households live in units built with outer walls of wood or plywood (57.64%) than of mixed tile, concrete, brick, stone and wood or plywood (17.38%) and of bamboo or sawali (15.44%). In the rural areas, more households occupy dwelling units constructed with outer walls of bamboo or sawali (42.58%) and nearly one-third or 32.06 percent, of wood or plywood. Rural households dwelling in units with outer walls of cogon or nipa comprise 13.05 percent (Table 2).

# YEAR BUILT

By period of building construction, 31.46 percent of the total households occupy structures built during 1976-1980; 21.89 percent, in 1971-1975; 24.83 percent, 1961-1970 and 13.68 percent, 1951-1960. Only 5.34 percent live in structures built in 1942-1950 and 2.80 percent, before World War II (Table 2).

## FLOOR AREA OF DWELLING UNIT

More than one-half (58.68%) of the total households occupy dwelling units with floor area of less than 30 square meters. Nearly one-fourth, or 24.90 percent live in dwelling units

with floor area of 30-49 square meters; 6.61 percent, 50-69 square meters and 4.06 percent, 70-99 square meters. Only 5.75 percent of the total households have spacious dwelling units with floor area of 100 square meters and over (Table 3).

# TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 330,767 households that own their dwelling units, 55.42 percent also own the land where the structure is erected. The rest of the households are distributed as follows: 12.99 percent, lessee or sublessee; 13.62 percent, farm lessee/agricultural tenant of landowner; 4.65 percent, other legal tenure and 13.32 percent, no tenure such as squatter, etc. (Table 4).

# KIND OF LIGHTING FACILITIES

Kerosene is still the most common type of lighting facility in the province with 71.83 percent of the total number of households using it. More than one-fourth (26.90%) use electricity; only 0.89 percent, liquefied petroleum gas (LPG); 0.09 percent, oil and 0.29 percent, other kinds such as candle or wax (Table 5). Compared to the past decade, the proportion of households using kerosene is 9.63 percentage points lower while that of households using electricity is 9.41 percentage points higher.

In urban areas, 53.90 percent use electricity while 44.99 percent use kerosene. In 1970 more than half (56.64%) of the urban households used kerosene while 42.25 percent used electricity. The proportion of rural households using kerosene (96.10%) was 4.37 percentage points higher during the past decade and that of households using electricity, 3.92 percentage points lower than the 1980 figures (kerosene -91.73%; electricity -6.88%).

# SOURCE AND USE OF WATER SUPPLY

The four main sources of water supply in the province are the faucet, community water system, the tubed or piped deep well, dug well and spring. Almost thirty percent (29.96%) of the households depend on the first as their source of water for drinking; 28.96 percent, for kitchen use and 27.05 percent, for washing clothes. On the other hand, 24.62 percent obtain drinking water from tubed or piped deep well; 22.40 percent, from dug well; 16.02 percent, spring and 5.52 percent, tubed or piped shallow well. Very few households utilize rain water (0.77%) and lake, river, stream, etc. (0.71%) for drinking.

For kitchen use 25.43 percent depend on dug well; 23.09 percent, on tubed or piped deep well and 15.66 percent, on spring. The proportion of households using these sources for washing clothes are 25.53 percent, 20.58 percent and 15.85 percent, respectively. Few households rely on tubed or piped shallow well for kitchen use (4.89%) and for washing clothes (4.38%). While 5.63 percent utilize lake, river, stream, etc. for washing clothes, only 1.02 percent depend on these sources for kitchen use. Rain, the least used among the sources, has nearly the same proportion of households — 0.95 percent for kitchen use and 0.98 percent for washing clothes (Table 6).

### **TOILET FACILITIES**

By type of toilet facilities, 20.65 percent use the water-sealed, sewer or septic tank; 16.04 percent, the closed pit (antipolo, etc.); 15.70 percent, water-sealed with other depository; 9.16 percent, open pit and 0.76 percent, other types (pail system, etc.). Households without toilet facilities constitute 37.69 percent.

Comparatively, urban households have better toilet facilities than rural households with 37.85 percent using water-sealed with sewer or septic tank; 19.98 percent, water-sealed with other depository and 16.60 percent, closed pit. About one-fifth (20.32%) are without toilet facilities. On the other hand, more than one-half (50.57%) of the rural households lack toilet facilities. The rest use closed pit (15.63%); open pit (12.67%) and water-sealed with other depository (12.53%). (See Table 7.)

### **COOKING FUEL**

Almost four-fifths (79.92%) of the total households use wood or charcoal for cooking. Only 8.85 percent use liquefied petroleum gas (LPG); 5.74 percent, kerosene; 4.79 percent, other kinds and 0.70 percent, electricity. Compared to the report of the past decade, a decrease of 7.86 percentage points is noted in the proportion of households using wood or charcoal. On the other hand, the proportion of households using LPG increased by 3.90 percentage points; kerosene, 0.67 percentage point; other cooking fuel, 3.15 percentage points and electricity, 0.14 percentage point.

In rural areas, 88.05 percent use wood or charcoal compared to 68.96 percent in urban areas. LPG is used by 19.08 percent of the urban households and only 1.26 percent of their rural counterparts. Likewise, kerosene is used by a higher proportion of urban (8.86%) than rural dwellers (3.43%). (See Table 8.)

# OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Of the total households in the province, 68.06 percent own a radio; 11.15 percent have a television set and 8.93 percent, a refrigerator or freezer. Over a 10-year period, the proportion of households with radio increased by 23.11 percentage points; with television set, 7.63 percentage points and with refrigerator or freezer, 4.87 percentage points.

In urban areas, almost three-fourths (74.74%) of the total households own a radio; 22.88 percent, a television set and 18.24 percent, a refrigerator or freezer. In rural areas, however, households with radios comprise 63.11 percent; with television set, 2.45 percent and with refrigerator or freezer, 2.03 percent (Table 9). Increases in the proportion of households with television sets and refrigerators or freezers are higher in urban than in rural areas — 14.11 and 8.38 percentage points, respectively, for the former and 2.00 and 1.38 percentage points, respectively, for the latter. In contrast, the proportion of rural households with radios increased 25.97 percentage points as compared to 16.48 percentage points for urban households.
